

# SC GREEN STEP SCHOOLS GATHERING

ST. MATTHEWS K8 SCHOOL • ST. MATTHEWS, SC  
TUESDAY, FEBRUARY 28 • 4:30-6:00PM

Current and prospective teachers and project mentors are invited to attend this gathering to learn how the Green Step Schools program can bring simple, student-led conservation projects into the classroom. See how students learn, do and teach others about environmental issues while having fun, improving their environment and earning Green Step awards! Attendees will leave with a door prize to jumpstart a school Green Step project.

The SC Green Step Schools program encourages and empowers SC educators and students to plan, establish and sustain projects that enhance the environment. The program provides support for student-led conservation projects such as school gardens, wildlife habitat, composting, recycling, rain barrels, and more.

## LOCATION

St. Matthews K8 School  
135 Saints Ave.  
St. Matthews, SC 29135
